

User Interaction Engineer

GoodGuide is building an information platform and suite of tools to inform the public about the health, environmental, and social impacts of products and companies, and to empower them to take actions to improve their lives and the world around them. We are an innovative “for benefit” startup at the forefront of integrating science, technology, and consumer research to empower the public. You can learn more about us at: <http://GoodGuide.com>

We are looking for a **Rock Star User Interaction Engineer** to help us design, build and improve our user interfaces. Your mission would be to create the best possible user experience in accessing this data: tools for our internal scientists to tweak the algorithm, unique visualizations for consumers to understand our data, or enterprise integration for corporations to manage data partnerships.. We’re on the web, and have an iPhone app as well. The technology stack we’re using is Rails, Linux and MySQL.

DUTIES

- Create pixel perfect mockups for new product features
- Implement interfaces
- Interacting with internal and external users to understand requirements
- Collaborate with product management and other developers on key features
- Be a great team member and help change the world!

REQUIREMENTS

- Smart, enthusiastic and driven
- Self motivated, you enjoy working in a small team with top notch developers
- Excellent communication skills
- 3-5 years of industry experience
- Significant experience building end to end applications
- Mastery of Photoshop/Illustrator, Flash
- Experience with CSS, JavaScript and Ajax
- Expansive portfolio of various web / or interface designs
- iPhone design experience a plus
- Art/Design degree a plus

GoodGuide offers a competitive salary, excellent benefits, and equity. GoodGuide is committed to building a culturally diverse team and strongly encourages applications from women and minority candidates. To apply please send your resume to: UIE@GoodGuide.com.
